

# Labels

A fast-growing product range of MAX MEYER is high-quality labels in many different colours, shapes and sizes. Together with your label printer they form a perfect unit.

By using label- and design software SignMax which includes a wide range of symbols, templates and useful clip arts, it's very easy to print pipe markers, prohibition signs, mandatory signs, inspection plates, inventory labels and many more! Companies, laboratories and factories are in a constant position to do their labelling in a fast, economic and professional way.

Our high-performance supplies ensure very durable and long lasting self-adhesive labels and signs. They are weather-proof (UV-light, humidity...), salt water-resistant, scratch-resistant and also chemical-resistant (E.g. gasoline, oil, turpentine, several acids and bases...).

The range of continuous tapes, die-cut labels and ribbons is perfectly fitted to the needs of industrial customers for indoor and outdoor marking.

Due to our modern production-facilities we are also able to make custom labels in many different shapes and colours on your demand.
